## Major order for foundation structures for AMBAU

**AMBAU GmbH has received its first complete order for offshore foundations. This is the largest individual order in the history of the company.**

Bremen: With AMBAU GmbH having already demonstrated its expertise as a supplier of main components for the foundations of the projects Global Tech 1 and Borkum West, the company has now received the largest single order for offshore foundation structures in the history of the company.

AMBAU GmbH is set to produce 80 sets of monopiles and transition pieces for the offshore wind parks Meerwind Süd and Meerwind Ost for Bremerhaven-based WindMW GmbH. 80 offshore wind energy units of the 3.6 MW class are planned for a site 23 km north of the island of Helgoland in the North Sea, from where they will supply 360,000 households with electricity.

"This order is a major step for us, a milestone in our company's history. We are looking forward to working together with WindMW GmbH," says Joachim Görlitz, Managing Partner of AMBAU GmbH.

AMBAU GmbH operates five production plants and employs a total of 820 persons. AMBAU Personalservice GmbH, AMBAU Windservice GmbH and AMBAU Offshore GmbH also belong to the corporate group.

The product portfolio of AMBAU GmbH ranges from towers for onshore wind energy plants right up to the large offshore towers for 5-megawatt-plus plants.

Beyond this, AMBAU's range of products includes offshore foundations, monopiles, tube components, transition pieces and secondary steel.

Renewable energies will continue to grow in significance and AMBAU GmbH is ideally placed to benefit from this growth market with five efficiently networked facilities in Germany, including Bremen, Gräfenhainichen, Am Mellensee, Dessau and Cuxhaven, together with the production capacity that they represent.

The foundation structures will be produced at all five AMBAU plants, with work commencing on 01 November 2011. Final assembly, intermediate storage and loading will take place in Cuxhaven.

WindMW GmbH is a joint venture of the Blackstone Group and Windland Energieerzeugungs GmbH.

With work beginning at the end of 2012 and commissioning at the end of 2013, Meerwind Süd/Ost will be the first German offshore wind park to be built and operated by a private investor.

Further information about WindMW GmbH and the Meerwind Süd/Ost project can be found at [www.windmw.de](http://www.windmw.de).
