

Further major order for AMBAU

Windreich AG commissions AMBAU with the manufacture of 80 tripods for the MEG Offshore 1 project

Bremen: The AMBAU GmbH success story continues. Windreich AG has placed an order with the company for the manufacture of 80 tripods for the MEG Offshore 1 project.

This is the largest complete order for offshore foundation structures to be received by AMBAU. Following the order for 80 sets of monopiles and transition pieces for the Meerwind project, AMBAU can now apply its expertise to the production of tripods.

The tripods for the 80 5-megawatt-class offshore wind energy units are to be manufactured at all five AMBAU sites, incorporating approximately 100,000 tonnes of steel. MEG Offshore 1 is to be located around 45 kilometres north of the island of Borkum. Approximately 1,500 million kilowatt hours of electricity are set to be generated each year.

Windreich AG is one of the leading initiators of the offshore wind industry. The strong corporate group is actively involved in creating the energy supply of tomorrow, productively placing the capital of numerous investors in regenerative energies.

Further information about Windreich AG and the MEG Offshore 1 project can be found at www.windreich.de.

AMBAU GmbH operates five production plants and employs over 850 persons. AMBAU Personalservice GmbH, AMBAU Windservice GmbH and AMBAU Offshore GmbH also belong to the corporate group.

The product portfolio of AMBAU GmbH ranges from towers for onshore wind energy plants right up to the large offshore towers for 5-megawatt-plus plants.

Beyond this, AMBAU's range of products includes offshore foundations, monopiles, tube components, transition pieces, tripods and secondary steel.

Renewable energies will continue to grow in significance and AMBAU GmbH is ideally placed to benefit from this growth market with five efficiently networked facilities in Germany, including Bremen, Gräfenhainichen, Am Mellensee, Dessau and Cuxhaven, together with the production capacity that they represent.
