

## **The AMBAU Corporate Group is growing**

### **The corporate group is adding to its performance portfolio by setting up AMBAU Offshore GmbH**

Bremen, Germany: All flags will be flying in the offshore direction from December 1, 2010 because this is when AMBAU Offshore GmbH will be launching its business activities.

AMBAU Offshore GmbH has a product and service portfolio focusing on companies whose activities are directly and indirectly involved in the offshore wind power market.

One concentration of AMBAU Offshore GmbH is consultation and project services along the entire value-added chain in building and operating an offshore wind power park. That starts with planning, continues on with organisation and goes right down to guiding and assisting domestic and foreign offshore projects in handling all regulations with official authorities.

Another accent is in procuring, operating and coordinating ships or building units and creating synergies among companies from these areas.

AMBAU Offshore's team consists of seasoned managers, chief engineers, logisticians and maritime experts from the wind power sector.

AMBAU GmbH operates five production plants and employs a total of 700 persons. AMBAU Personalservice GmbH, AMBAU Windservice GmbH and AMBAU Offshore GmbH also belong to the corporate group.

The product portfolio of AMBAU GmbH ranges from towers for onshore wind energy plants right up to the large offshore towers for 5-megawatt-plus plants.

Beyond this, AMBAU's range of products includes offshore foundations, monopiles, tube components, transition pieces and secondary steel.

Renewable energies will continue to grow in significance and AMBAU GmbH is ideally placed to benefit from this growth market with five efficiently networked facilities in Germany, including Bremen, Gräfenhainichen, Am Mellensee, Dessau and Cuxhaven, together with the production capacity that they represent.

When we caught up with Michael Nowak, the CEO of AMBAU Offshore GmbH, this is what he had to say about the project: "Offshore wind power has a key role to play in expanding regenerative energies. This is why my team and I are looking forward to meeting these challenges together with our customers".
